

# Metal gutter accessories

## Next generation

Building

**NEW**

### FIBRE CEMENT

### STEEL PANEL

Nicoll knows what those in the roofing business want and uses innovation to develop new, direct fix gutter brackets which cater for all of your needs.

#### ADVANTAGES :

- **More convenient** : slots in place with a single blow of a hammer or mallet.
- **Faster** : reduces time needed to install brackets.
- **Tougher** : highly resistant to corrosion. Brackets have 2 times more pull-out resistance compared to previous generations.
- **More visually appealing** : refined design, no visible fastenings

# Metal gutter accessories Next generation

Building

Nicoll's new metal gutter brackets fasten directly to the roof.

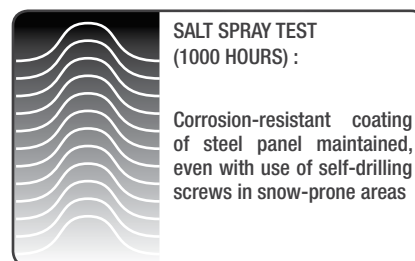

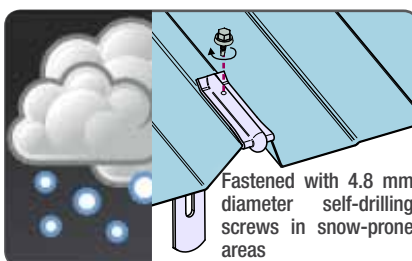

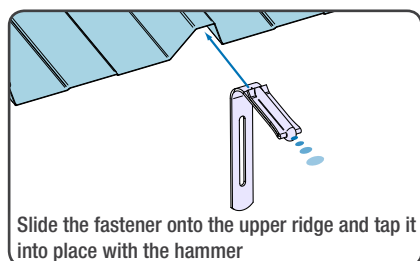

## NICOLL ADVANTAGES

### 2 models for metal and fibre cement roofs

- 2 times more pull-out resistance than previous brackets
- Hole for fastening with screw in snow-prone areas
- 25 x 2.5 mm strip made from new highly resistant flexible material
- New preformed 15° angle for less manual adjustment
- Steel is hot dip galvanised after manufacture

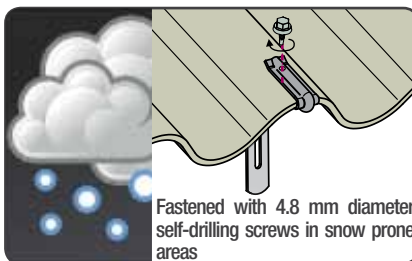

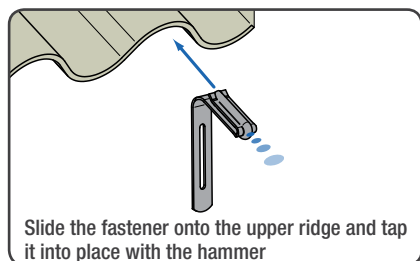

## INSTALLATION OF BRACKETS ON METAL ROOF

- Steel panel with a thickness of 0.63 to 0.75 mm and a pitch of 10° to 45°

## INSTALLATION OF BRACKETS ON FIBRE CEMENT ROOF

- Fibre cement with a thickness of 6 to 6.5 mm and a pitch of 10° to 45°

## RANGE

### STEEL PANEL - CORRUGATED IRON
