

NICOLL, STORMWATER UNDER CONTROL

HARVEST - DRAIN - ATTENUATE/INFILTRATE

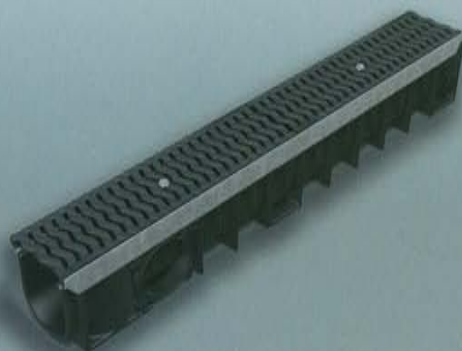

akasison®

Siphonic roof
drainage systems

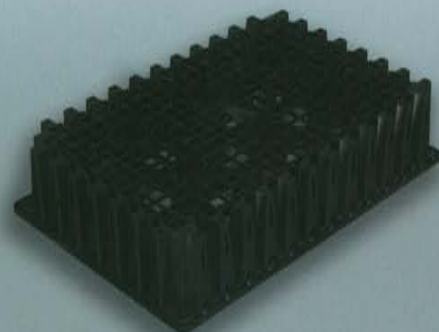

kenadrain®

Run-off water
drainage systems

waterloc

Stormwater
attenuation/infiltration systems

akasion® L & XL

Siphonic roof drainage systems

- Freedom of design and optimized space
- Material & installation costs are reduced through smaller pipe diameters, low weight, fewer down pipes and roof outlets, and less groundwork.
- Easy and quick to install
- Safety network

waterloc

Stormwater attenuation/infiltration systems

- Capacity 250 liters (96 % void)
- Easy and quick to install
- Stackable and easy to carry

kenadrain®

Run-off water drainage systems

- Efficiency and easy installation
- Comply to European standard EN 1433 and CE mark
- Widths 100, 150, 200 and 300
- Kenadrain® HD : drainage channels with metallic edges, class A to D
- Kenadrain® MD : drainage channels without metallic edge, class B and C

Nicoll

Sustainable Development

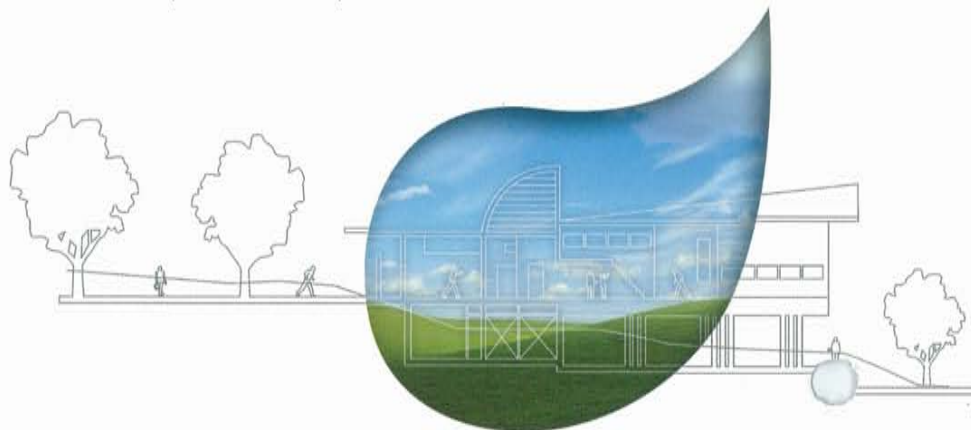

Sustainable environmental development, ecology, respect for environment, waste treatment, energy saving have become key factors in the economic life. The building sector and Nicoll actively help people to be aware of and how to change behaviours to respect environment.

Nicoll has a range of products that comply with national environmental requirements.

Nicoll is an ISO 14001 certified company

Since 1996, Nicoll has put environmental requirements at the heart of its strategy.

Nicoll comply with national environmental requirements in its production and in development of new products..
